

Explaining Dataset Changes for Semantic Data Versioning with Explain-Da-V

Literature review - Read the paper and determine the structure of the report and meet with Prof./TA to discuss structure.

1. Title Page:

2. Abstract:

- We will summarize the research paper in a concise manner by highlighting the main objectives, methods, results, and conclusions.

3. Introduction:

- We will provide background information on the research paper's topic by explaining the importance of the research and its relevance and by stating the research paper's objectives and purpose.

4. Literature Review:

- We will discuss related research and theories relevant to the paper by highlighting gaps in the existing literature that the paper addresses & explain how the paper builds upon or contributes to the field.

5. Methodology:

- We will describe the research methods used in the study and include details about data collection, participants, and instruments to explain the statistical or analytical techniques used.

6. Results:

- We will present key findings of the research and use tables, figures, and graphs to illustrate the data and discuss any trends, patterns, or significant results.

7. Discussion:

- We will interpret the results and their implications, analyze the findings in the context of the research objectives to discuss any limitations of the study. We will also address unanswered questions and propose future research directions.

8. Conclusion:

- We will summarize the main points of the research paper and restate the significance of the study and its contributions. We will also provide a brief synthesis of the key findings.

9. References:

- List all the sources cited in the report following a specific citation style.

10. Appendices:

- Include any supplementary information, such as additional data, charts, or calculations.

Questions for T.A?

1. Where to submit?
2. Number of pages?
